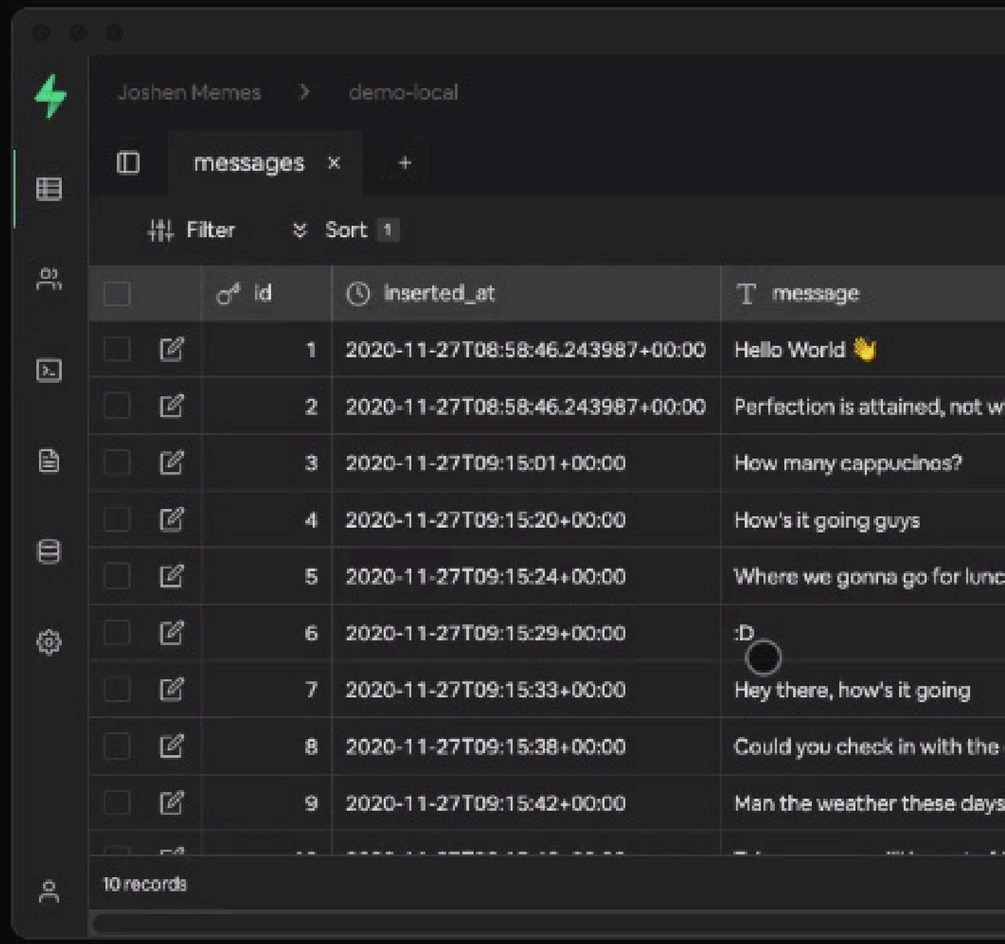
The Open Source Firebase Alternative

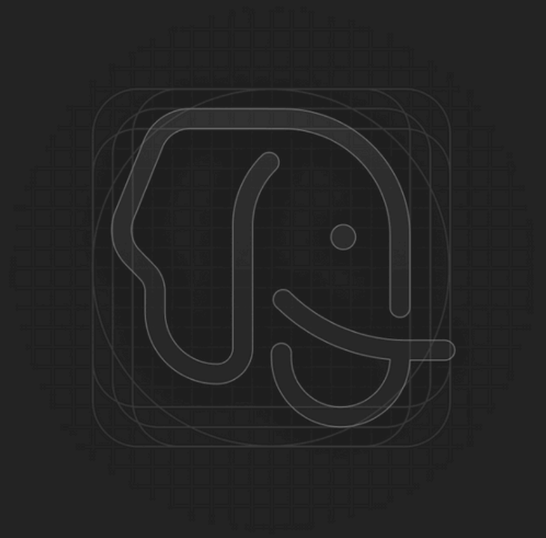
Start a project >



Database

Every project is a full Postgres database, the world's most trusted relational database.

- ✓ 100% portable
- ✓ Built-in Auth with RLS
- ✓ Easy to extend

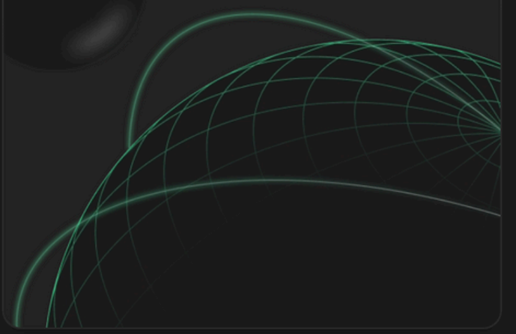


Authentication

Add user sign ups and logins, securing your data with Row Level Security.

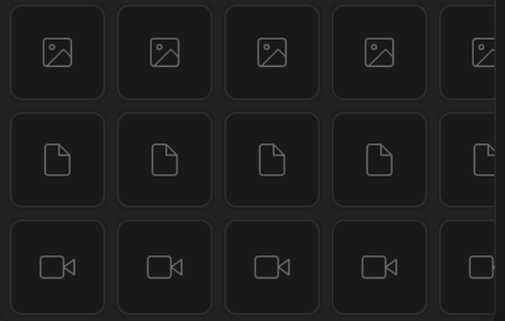
Edge Functions

Easily write custom code without deploying or scaling servers.



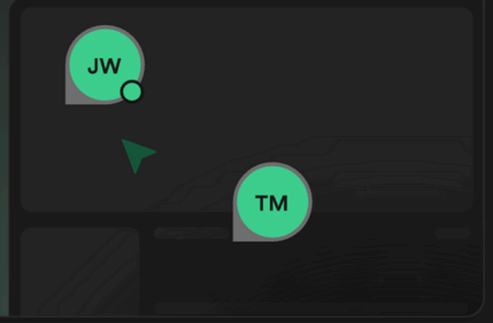
Storage

Store, organize, and serve large files, from videos to images.



Realtime

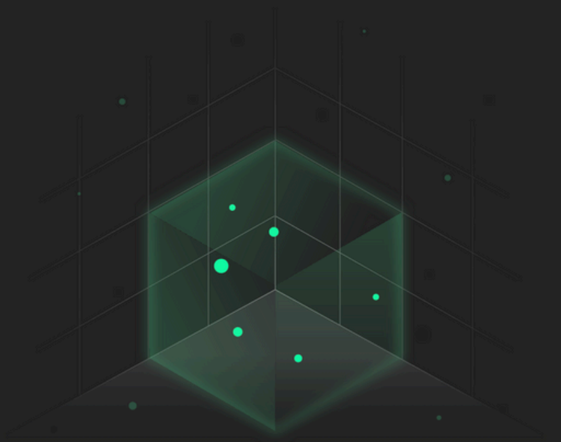
Build multiplayer experiences with realtime data synchronization.



Vector

Integrate your favorite ML-models to store, index and search vector embeddings.

- OpenAI
- Hugging Face



supabase

supabase Product Developers Pricing Docs Blog 69.8K Dashboard

Perfect for passion projects & simple websites.

Start for Free

$0 / month

Get started with:

- Unlimited API requests
- 500 MB database space
  Shared CPU • 500 MB RAM
- 5 GB bandwidth
- 1 GB file storage
- Community support

Free projects are paused after 1 week of inactivity. Limit of 2 active projects.

PRO Most Popular

For production applications with the ...er to scale.

...ted

From

$25 / month

$10 in compute credits include...
Need more compute?

Everything in the ...n, plus:

- ...onthly active users
  ...$0.00325 per MAU
- 8 GB database space
  then $0.125 per GB
- 250 GB bandwidth
  then $0.09 per GB
- 100 GB file storage
  then $0.021 per GB
- Email support
- Daily backups stored for 7 days
- 7-day log retention

TEAM

Add features such as SSO, control over backups, and industry certifications.

Get Started

From

$599 / month

$10 in compute credits included
Need more compute?

Everything in the Pro Plan, plus:

- SOC2
- HIPAA available as paid add-on
- Read-only and Billing member roles
- SSO for Supabase Dashboard
- Priority email support & SLAs
- Daily backups stored for 14 days
- 28-day log retention

ENTERPRISE

For large-scale applications running Internet scale workloads.

NodeJS

https://nodejs.org/pt

GitHub

https://git-scm.com/download/gui/windows

Instalar o App

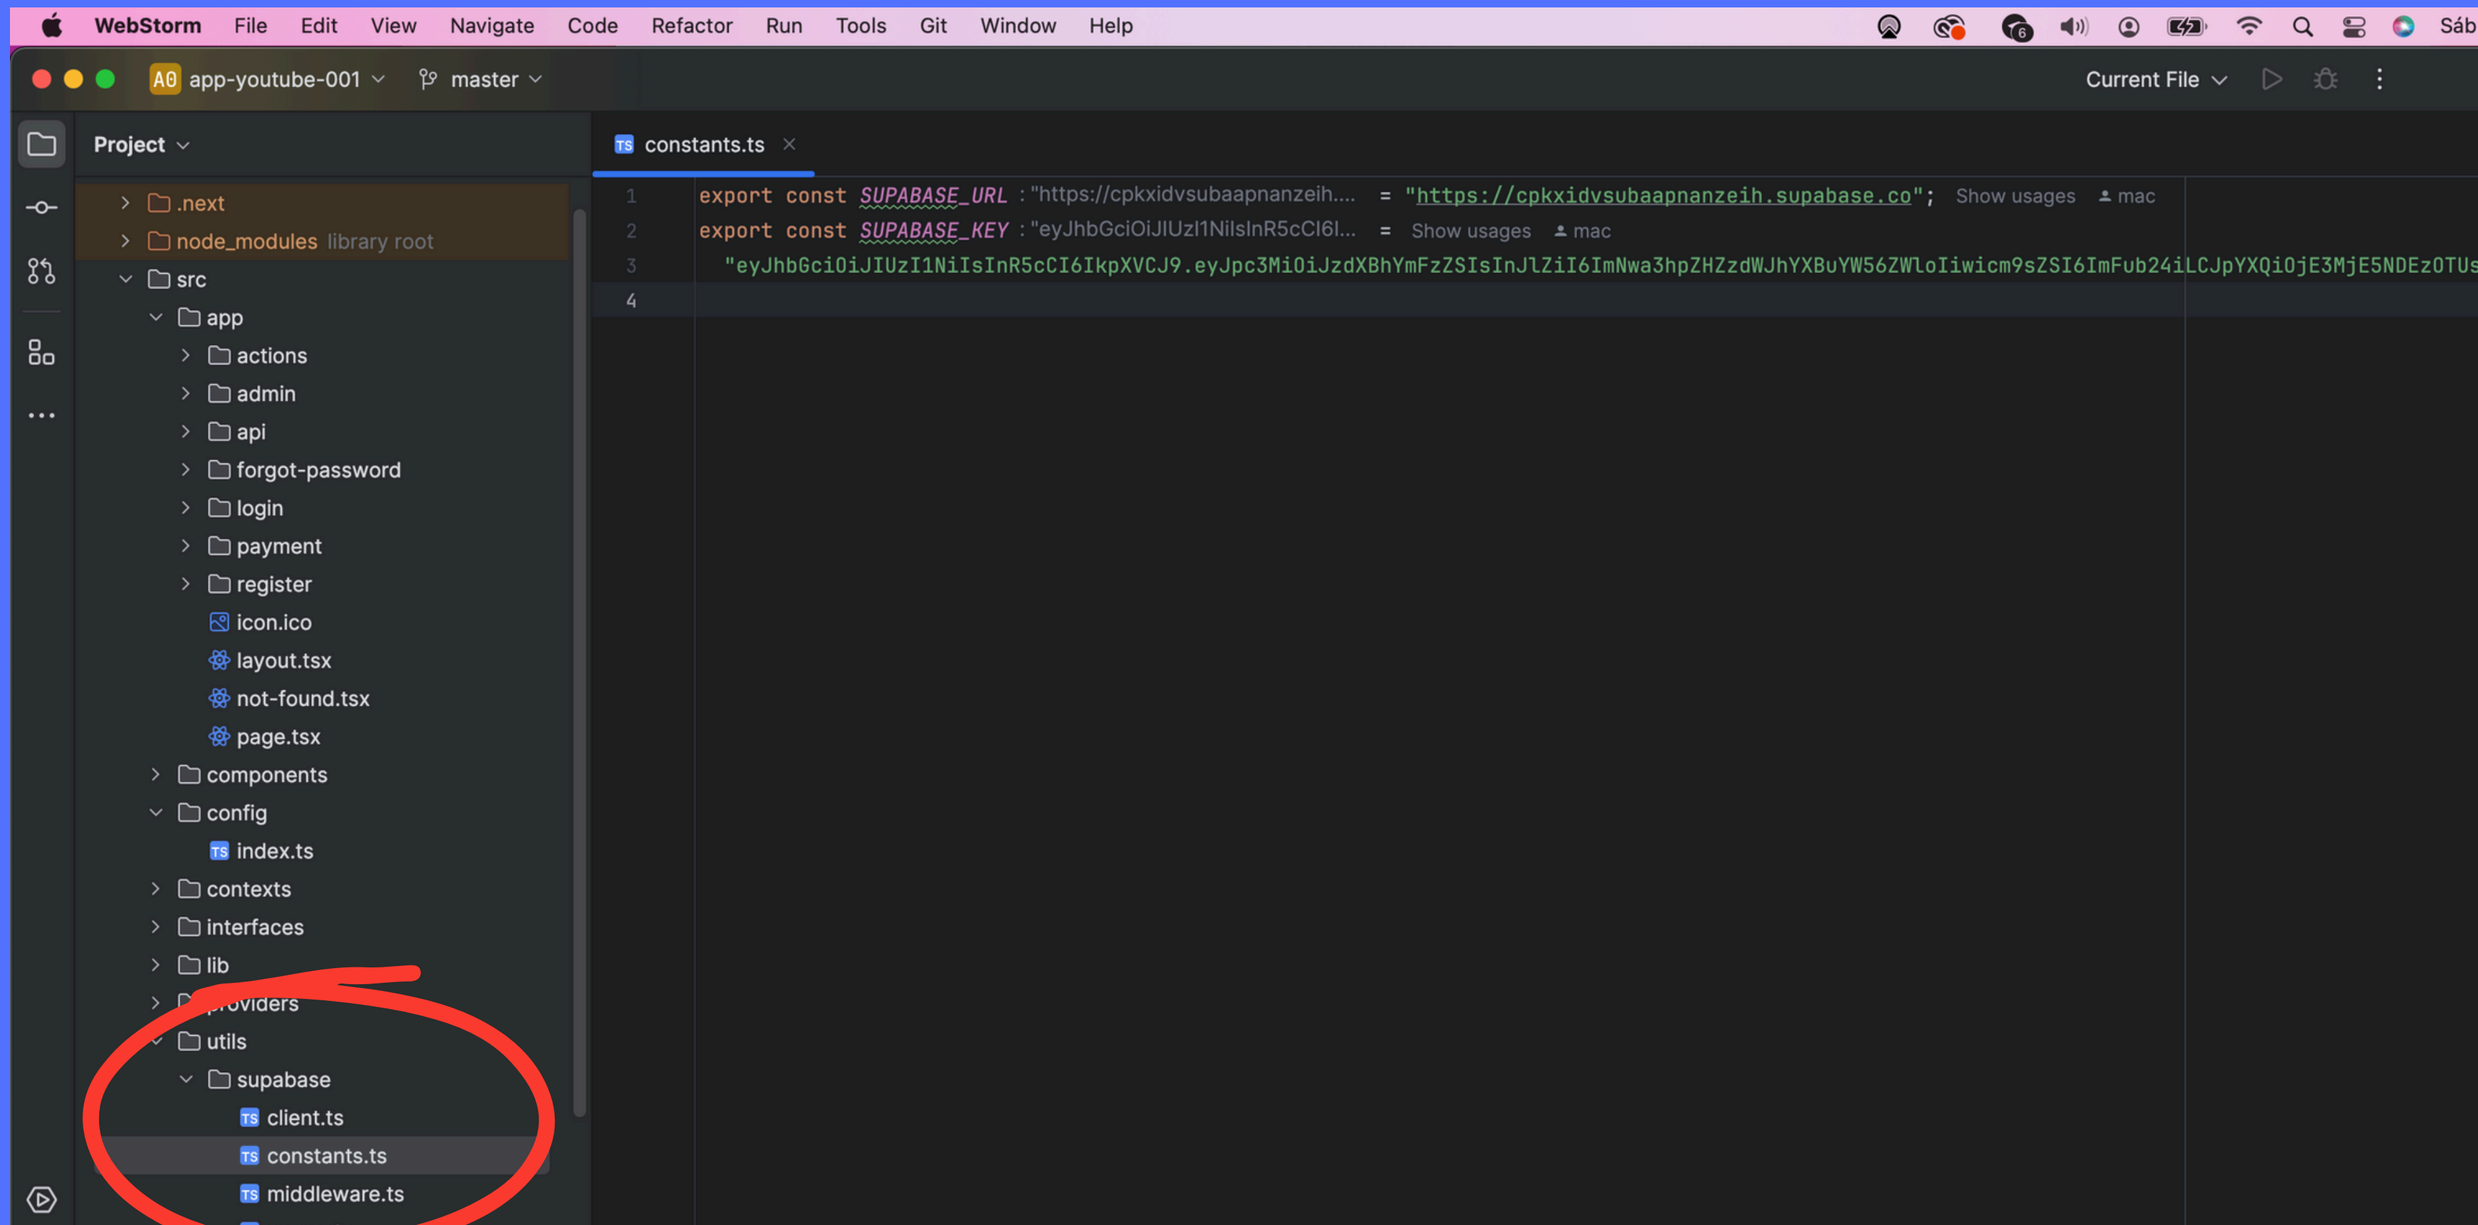
baixar o arquivo em: aalencar.com.br/baixar

Após descompactar o arquivo execute:

cd app-youtube-001

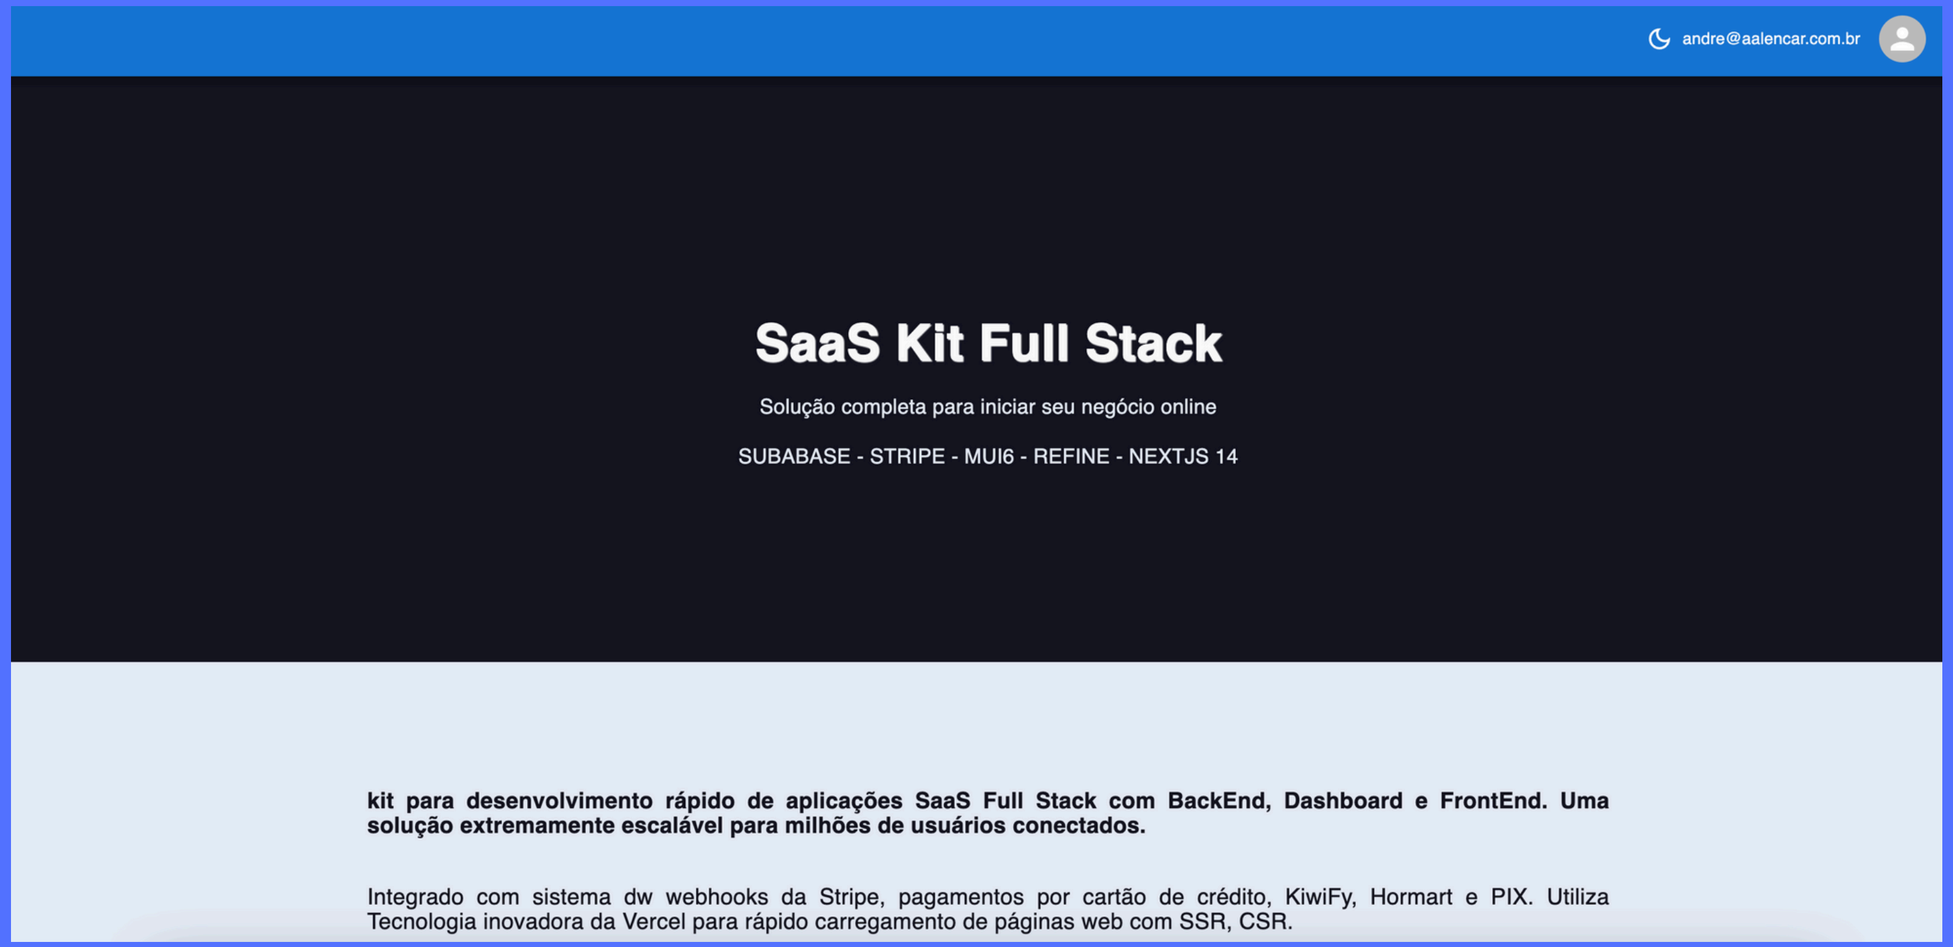
npm i

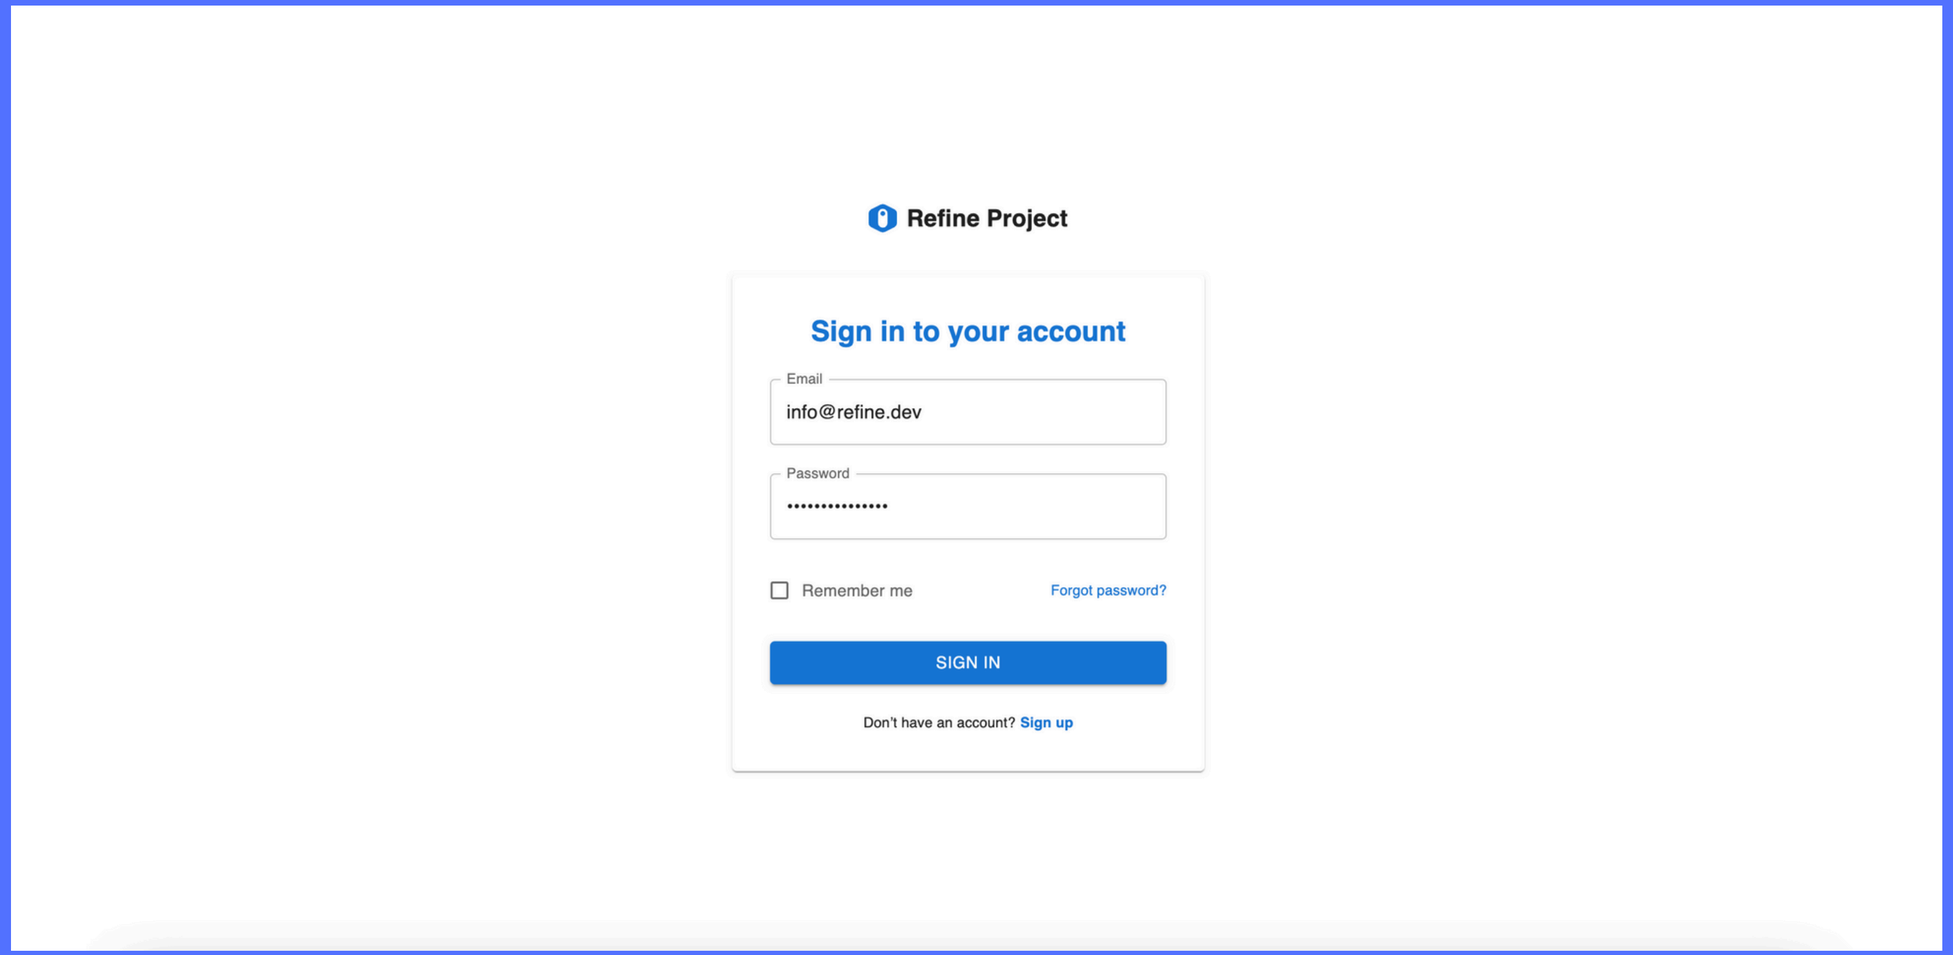
Substitua os valores no arquivo pelos seus dados da sua conta do Supabase



npm run dev

http://localhost:3000





http://localhost:3000/login
